SMS Holdings are the most trusted name of the industry with SLS/ISO Certification for Solid & Cellular cement blocks since 2001.

The sturdy build of these products have increased its usage in several constructions and building projects due to its various advantages than the conventional bricks.

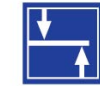

SMS blocks are manufactured using high sophisticated hydraulically operated concrete block making machineries with strength, precision and 100% guaranteed quality to industrial standards. Moreover, SMS blocks are manufactured and designed to match with Standard Structural design requirements with cost saving and fast construction.

ADVANTAGES OF USING - CELLULAR & SOLID BLOCKS

Cost Saving on Wall Plastering

SMS cement blocks are designed to eliminate the plastering cost. Skim coat is enough and no need to plaster.

Low Breakage & High Strength

SMS Blocks are manufactured to the highest SLS quality standards at all times, and the strength of our blocks, far exceed the SLS stipulated standards as well. We also manufacture Solid & Cellular Blocks to 'Customized Strength Gains' to match special requirements and specifications.

Sound Installation

Sound cut off exceeds 40% and more.

Match with Architectural Design Requirements

SMS Blocks are manufactured and designed to match with *Standard Structural design requirements*. Lower weight in cellular blocks which easily can be used in upper floor to bear the load.

Time Saving and Fast Construction

SMS Blocks help to build timely constructions which result in saving time and cost.

Manufactured in sophisticated hydraulic machineries

SMS Blocks are manufactured using high sophisticated hydraulically operated concrete block making machineries with strength, precision and 100% guaranteed quality to Industrial standards.
